1.0	07/25/2013	Vishesh Bagga	Initial Draft
2.0	07/26/2013	Ryan Marinello	Updated review comments
2.1	09/17/2013	Ryan Marinello	Context editing
2.2	09/17/2013	Ryan Marinello	Added requirement traceability

Test Scripts

Script Description

Validations before exiting the webpage for creating property configuration

User Interface Requirement associated within test script (see below)

Testing Requirements

This test scenario covers the following high-level test:

- RADPM.2.3

User Groups

Configuration Administrators

Smarter Balanced /Program Management

Program Management/Add a property

Script 12.0 Validations before exiting unsaved changes

Setup

Program Management is operational and MongoDB is connected

QA staff has either a Local or Cloud environment deployed for testing to interact with UI.

QA Staff must also have a REST Client available to perform tests with verb GET, POST, PUT or DELETE

QA staff must test the script on Internet Explorer 8+ (Windows), Firefox 8+ (Macintosh, Linux & Windows), Safari 5+ (Macintosh), Chrome 16+ (Macintosh, Linux & Windows)"

Teardown

- None

Script Steps

Step #	Test Action	Expected Results
1	Access PMI (http://localhost:8080/pmi) and click the "System Property Configuration" button for creating a new configuration	Interface should open and should have an option to create a new configuration
2	Repeat Step 1 on Chrome, Firefox, IE, Safari browser	Interface should open up and it should be similar across all browsers
3	Click "New" button to add a new configuration	Corresponding PMI page should open. UI should have option to name the configuration, set the Target environment and add properties for the configuration. There should be no Save button
4	Type in something for Name , Environment text field	Save button should become visible
5	Add a key value pair and enter some values for them	Values should get populated in respective fields
6	Without saving this, hit the browser Back button or click the link for Home	A warning message should show up saying that you have unsaved changes and it should have 2 buttons to either Continue or Cancel

Smarter Balanced RFP#11/Program Management

Program Management/Validations and warnings
