| Version # | Date | Author | Description |
|-----------|------------|--------------------|------------------|
| 1.0 | 09/30/2013 | Sujatha Kandikonda | Initial Draft |
| 2.0 | 10/03/2013 | Ryan Marinello | Review and edits |

Test Scripts

Script Description

As a Progman administrator I want to edit existing System configuration

User Interface Requirement associated within test script (see below)

Testing Requirements

This test scenario covers the following high-level test:

- PRPM.1.2, PRPM.1.3

User Groups

Configuration Administrators

Script 1.0 System Properties Configuration- Property Edit

Setup

Program Management is operational and MongoDB is connected

QA staff has either a Local or Cloud environment deployed for testing to interact with UI.

QA Staff must also have a REST Client available to perform tests with verb GET, POST, PUT or DELETE

QA staff must test the script on Internet Explorer 8+ (Windows), Firefox 8+ (Macintosh, Linux & Windows), Safari 5+ (Macintosh), Chrome 16+ (Macintosh, Linux & Windows)"

Teardown

- None

Smarter Balanced /Program Management

Program Management/Add a property

Script Steps

| Step # | Test Action | Expected Results |
|--------|--|--|
| 1 | Access PMI http://localhost:8080/rest/ and click the "System Property Configuration" button for creating a new configuration | Interface should open and should have an option to create a new configuration. Try this on different browsers like Chrome, Firefox, IE, Safari |
| 2 | Click on "New" button to add a new configuration | Corresponding UI should open. UI should have option to name the configuration, set the Target environment and add properties for the configuration |
| 3 | Give a name to the configuration(say test_pmi) and set a Target environment(say QA) | Defined configuration name along with the provided environment should get created. Verify the same using MongoDB |
| 4 | Create a key value pair for environment test_pmi(say key=test_url, value tib_url) and click Save button | A key value pair should get created. |
| 6 | Go to Home > System Property Configuration | Configuration Search page should be displayed |
| 7 | Search for the configuration that was created in the earlier steps | Search result with Config Name, Environment with corresponding Edit icon and History icon should be displayed |
| 8 | Click on Edit icon corresponding to the Config Name | Configuration History page with Name, Environment and history displaying Date and Type should be displayed |
| 9 | Edit Name, Environment, key and values and click Save | Property Configuration should be saved with the edited values |
| 10 | Query the same through MongoDB | Database and Rest Client should show: <ul style="list-style-type: none">Edited configuration name, environment, key and key values |
| 11 | Requirement | RADPM.2.2, PRPM.1.3, PRPM.1.4 |
