3.0	09/30/2013	Ryan Marinello	Final review and edits

Test Scripts

Script Description

As a System Administrator, I want to be able to search a tenant User Interface Requirement associated within test script (see below)

Testing Requirements

This test scenario covers the following high-level test:

- RADPM.2.3

User Groups

System Administrators

Script 4.0 System Properties Configuration- Property History

Setup

Program Management is operational and MongoDB is connected

QA staff has either a Local or Cloud environment deployed for testing to interact with UI.

QA Staff must also have a REST Client available to perform tests with verb GET,POST, PUT or DELETE

QA staff must test the script on Internet Explorer 8+ (Windows), Firefox 8+ (Macintosh, Linux & Windows), Safari 5+ (Macintosh), Chrome 16+ (Macintosh, Linux & Windows)"

Teardown

- None

Smarter Balanced /Program Management

Program Management/Search Tenant

Script Steps

Step #	Test Action	Expected Results
1	Access PMI (http://localhost:8080/pmi) and click the "Manage Tenants"	Interface should open and should have an option to create a new tenant or to search an existing one. Try this on different browsers like Chrome, Firefox, IE, Safari
2	Click on "New" button to add a new tenant	Corresponding UI should open. UI should have enter a State and District value so as to create the tenant-tenancy relation
3	Provide a value for the State and for the District(say state= Minnesota and District=Maple Grove) and click Save	Tenat-Tenancy relation for the provided State-District value should get created. Verify the same using MongoDB or via REST Client, or URL
4	Go to the Home screen and go to Manage tenant	Corresponding UI should open up
5	Search based on State(say Minnesota)	Matching results should show up in the table beneath. Verify the same by querying MongoDB
6	Search based on District(say maple Grove)	Matching results should show up in the table beneath. Verify the same by querying MongoDB
7	Search based on both State and District(say State= Minnesota and District= Maple Grove)	Matching results should show up in the table beneath. Verify the same by querying MongoDB
8	Search based on a State OR District OR State-District combo for which no relationship is created(check DB for non-existent record)	No matching results should get displayed
