2.0	10/03/2013	Ryan Marinello	Review and edits

Test Scripts

Script Description

As a Progman administrator I want to edit existing System configuration

User Interface Requirement associated within test script (see below)

Testing Requirements

This test scenario covers the following high-level test:

- RADPM.1
- RADPM.2.2
- PRPM.3.5

User Groups

System Administrators

Script 20.0 Manage tenants - Edit

Setup

Program Management is operational and MongoDB is connected

QA staff has either a Local or Cloud environment deployed for testing to interact with UI.

QA Staff must also have a REST Client available to perform tests with verb GET, POST, PUT or DELETE

QA staff must test the script on Internet Explorer 8+ (Windows), Firefox 8+ (Macintosh, Linux & Windows), Safari 5+ (Macintosh), Chrome 16+ (Macintosh, Linux & Windows)"

Teardown

- None

Script Steps

Step #	Test Action	Expected Results
1	Access PMI http://localhost:8080/rest and click the "Manage Tenants"	Interface should open and should have an option to create a new tenant or to search an existing one. Try this on different browsers like Chrome, Firefox, IE, Safari
2	Click "New" button to add a new Tenant	Corresponding UI should open and should have option to enter Tenant Name, Tenant Type and description. List of components are displayed with the option to associate relationship with tenant (say good standing flag)
3	Provide a value for Tenant Name, Tenant Type and Description. Set good standing flag for some of the components that are listed and click Save	Tenant should create
4	Go to Home > Manage Tenants	Tenant Search page should display
6	Search for the Tenant that was created in the earlier steps	Search result with Tenant Name, Description and Type is displayed
7	Click Edit icon corresponding to a Tenant Name	Edit Tenant Information page with Tenant Name, Tenant Type and Description with list of components is displayed
8	Edit Tenant Name, Tenant Type, Description. Edit association of few components with the tenant (say good standing flag)	Tenant should be edited with the newly set values
9	Click Save	Tenant should be saved with the edited values
10	Query the same through MongoDB or REST client	Database and Rest Client should return: Edited Tenant Name, Tenant Type and Description with list of components is displayed
11	Requirements	• RADPM.1 • RADPM.2.2 • PRPM.3.5 • RADPM.2.2 • PRPM.1.3 • PRPM.1.4
